

# SPECIALISTS IN THE SUPPLY OF COATING CONSUMABLES AND PREPARATION PRODUCTS

VI was established in 2005 as a supplier of personal protective equipment, work wear and other industrial consumables to a variety of industries.

In 2007 a specialist division was created to serve the resin flooring, car-park, deck water-proofing and applied liquid roofing sectors with all its consumable requirements.

The aim of this division is to provide our customers with a comprehensive supply service that takes away the hassle of purchasing consumables from different sources, reduces the requirement of our customers to hold stock and eases the logistics of delivery to a project site. Our impact as a reliable, cost effective and friendly supplier has been considerable, and we are proud to be the preferred supplier of consumables to some of the best known names in the industry.

We have also developed relationships with trade organisations associated with the industry including FeRFA, CRA and the LRWA.

## What we stock

VI holds stock of a comprehensive range of application tools and ancillary products which are supplied via a next day delivery service throughout the UK. Our top-level service features working together with customers to provide exactly what they require.

## What we do

We stock a vast range of products used in the flooring, concrete repair, and liquid roofing industry. We aim to deliver all orders placed before 2pm on a next day service to mainland UK and 2-3 day service Europe wide. Delivery can be made to any location of our customers choosing.

In addition to specific coating and construction consumables, we can also supply PPE, work wear, janitorial products, skin-care, paper products, hand and power tools.

## Benefits

- Reduction in the internal administration costs and external carriage charges incurred from buying from multiple suppliers.
- Reduction in stock holding by using our investment in inventory.
- Consolidation of purchasing to a single source provides greater transparency of project costs.
- Working together to fulfil your supply requirements.
